

RFP 14-14 Parks Aquatic Services Questions Addendum III

1. By attendees as it relates to the guard to attendee ratio, are you stipulating all people present in the enclosure or only those swimming? **The ratio is particular to active swimmers in the pool.**
2. For the purposes of preparing an accurate proposal, please supply 2014 attendance records. **There were at total of 2126 admissions to City of Brookhaven pools in 2014. There were also 56 rentals for which the previous management company staffed. Unfortunately the exact attendees at each pool is unknown.**
3. Who will be responsible for access control? The RFP speaks to entering admission related information into your REC 1 system, but is vague as to any other specific duties related to management of admission. **This will be the responsibility of the aquatic facility contractor. They will be supplied access to the city's recreation software system which is web hosted, but they will be tasked with staffing each site with an employee to obtain admission and to input admissions and information into the city's Rec1 software system.**
